### SNOOPER S5

The Signature Series Snoopers S5 offers comprehensive cover of all radar and laser based Speed Traps by utilising SNOOPER's unique EUROTECH 2000 Technology increasing your awareness of both your speed and your surroundings.

The S5 has been designed to help you drive within the confines of today's Speed Limits. However it will not only help keep your licence safe - a recent survey undertaken in the UK by MORI concluded that Radar Detector users had 24% fewer accidents.

This compact detector is powered from the vehicle's cigarette lighter and can be mounted either on the dashboard, the sunvisor or on the windscreen with the suction cup bracket provided.
